In Re: Consultant Selection, Proposed Loveland
Miamiville Wastewater Treatment Plant

Dear Ms. Brown:

The Clermont County Sewer District is currently in the process of selecting consulting engineers for work on the 2004 capital improvement projects. Responses to our Requests for Qualifications (RFQ) were received by the Sewer District on February 17, 2004.

Twelve consultants listed the proposed Loveland Miamiville Wastewater Treatment Plant as their first or second choice of design projects. From this group we short listed three firms as the most qualified: Burgess & Niple, BBS Corporation and PDR Engineers. During the last week of February, we interviewed each firm and listened to their proposed approach to site selection and design. Since site selection is such an important issue, we paid special attention to each firm's proposed process to determine final location for the facility.

We hope to have a consultant under contract in early April. Once selected, they will be analyzing all information developed to date including past studies, correspondence, OEPA and community issues. We will notify you of our selected consultant and will forward your concerns and suggestions for consideration in the site selection.

We appreciate your interest and will keep you informed as we move forward with this project.

Sincerely,

THOMAS C. YEAGER
Director of Utilities
